

# ACCOSSATO

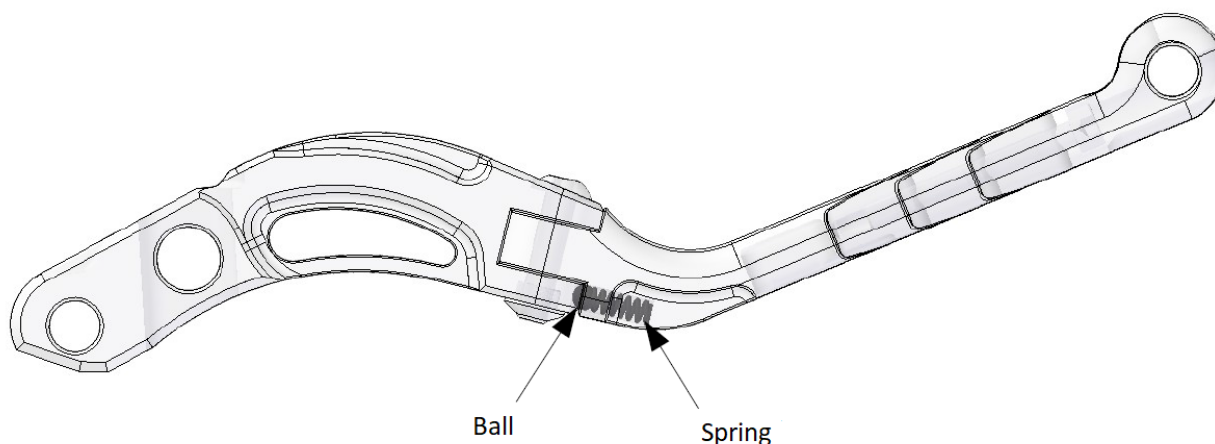

## REVOLUTION BRAKE/CLUTCH LEVER

You are able to extend and shorten the lever with a system of inserts.

Revolution levers are CNC-worked in aluminium alloy. You can customize the final part of the lever with colourful inserts.

### OVERTURNING SYSTEM OF ACCOSSATO FOLDING LEVER

You can find a hole with inside a spring and a ball on the Revolution lever. In case of falling, the ball supports in the moment the pilot wants to take the lever back to its original position, no matter if the lever has moved up or down.

### HOW TO EXTEND OR SHORTEN YOUR LEVER

Unscrew M4 screw on the tip of the lever.

Remove or add the inserts in order to modify the length of the lever.

**Please note:** Long Revolution Lever comes with 2 inserts.

Mount again the final part of the lever and insert M4 screw.

#### **Caution:**

Use screw M4x12 from the kit, in case both central inserts have been removed.

Use screw M4x25 from the kit, in case you have 1 central insert.

Use screw M4x35 from the kit, in case you have 2 central inserts.
