Italiano	English
<p>L'installazione del kit collettori 71718MI e dei vari kit Competition richiede la rimozione della valvola allo scarico. Il sistema diagnostico (EODB) potrebbe segnalare un errore, forzando la centralina ad entrare in modalità protezione. E' quindi consigliato, installando il kit collettori 71718MI o uno dei kit Competition, di utilizzare un emulatore elettronico della valvola allo scarico tra quelli disponibili in commercio. In alternativa, è consigliabile utilizzare mappature che escludano la funzione valvola.</p>	<p>When installing collectors kit 71718MI and all Competition systems, it is needed to remove the exhaust valve system. On-board diagnostic system (EOBD) may display a warning message, causing also the ECU to enter "recovery" mode. When installing 71718MI collectors or any Competition systems, to install an electronic valve emulator, available in the market. As an alternative, it is suggested to use maps de-activating valve function.</p>
