## **FITTING INSTRUCTIONS**

- To fit the R&G Brake Lever Guard, you will need to remove the original bar-end using the specific tools to your bike.
- Place the counter-sunk bolt (**item 5**) through the brake lever guard (**item 1**).
- Place the smallest (unthreaded) cone spacer (**item 4**) over the exposed thread (so it sits against the lever guard).
- Place the expander (**item 3**) over the exposed thread (so it sits against the tapered spacer just fitted).
- Place the tapered nut (**item 2**) onto the thread and engage until it locates in the expander just fitted.
- Locate the assembly into the bar and position so when the motorcycle is at full lock in both directions it does not contact any other part of the motorcycle or **restrict throttle use**.
- Using a 4mm Allen tool, fully tighten the bolt and check operation.

**IMPORTANT - WHEN FITTING THIS PRODUCT, IT IS YOUR RESPONSIBILITY TO ENSURE THAT THE PRODUCT IN NO WAY IMPEDES THE OPERATION OF THE MOTORCYCLE AND IS CHECKED REGULARLY FOR TIGHTNESS AND CORRECT OPERATION.**
